

Mechanical behavior of polymers at high strain rates

DEPARTMENT OF
CIVIL AND
MECHANICAL
ENGINEERING

2024
APR 15-16

Angevin-Aragonese Castle

GAETA (LT) - ITALY

The Second Workshop of the AIAS Topical Group "XTREMA" will focus on the mechanical characterization, modeling, and finite element simulation of polymers subjected to impulsive loads, such as those resulting from impacts.

Feel free to contact us to attend the meeting and connect with experts, academics, and researchers engaged in the study of the mechanical response of materials under extreme conditions.

Local organizers:

Prof. Andrew Ruggiero

Prof. Gianluca Iannitti

Dr. Sara Ricci
