The Department of Economics and Law (DipEG) results from the merging of the two pre-existing Faculties of Economics and Law, with the aim of enhancing and coordinating, in an interdisciplinary perspective, research and teaching in the fields of business, economics and law. The Department is culturally and scientifically rooted in the positive experience of the three previous Departments of economic and legal area (Legal Sciences and Social Policies, Economic Sciences, Environmental Enterprise and Management), which were part of the two Faculties of Economics and Law. Professors and researchers belonging to the Department are engaged in national and international research projects, working individually or in interdisciplinary teams, and in teaching activities, in single-cycle, bachelor’s and master’s degree courses. They also develop applied research activities in agreement with companies and public and private authorities, contributing directly and concretely to the development of synergies and to the growth of the territory (“third mission”). The Department also runs a PhD programme and a number of master and higher education courses in its fields of activity. The Department’s mission is defined as follows:

- it promotes excellence in research and teaching in the fields of business, economics and law, thus participating in the process of construction and consolidation of the European Research Area;
- it contributes to the economic, social and cultural development of the territory, also through collaborations with public administrations and companies;
promotes the culture of law and business in all its forms, with particular attention to the link between legality and entrepreneurship. The Department’s mission is pursued through five lines of action:

- an offer of study courses addressed to students at all levels, intended to facilitate their entry into the labor market or to support their professional growth;
- a wide range of research and dissemination initiatives, whose results are diffused at a national and international level, within the framework of the European Research Area;
- an intensive transfer of knowledge and innovation to local companies and actors;
- projects in synergy with the territory, by encouraging the creation of spin-offs and start-ups, and the support to companies, professions and public administrations at different levels;
- the constant attention paid to internationalization of research, teaching and integration of the different cultures involved in the training and research processes.
EDUCATION

Courses of DipEG are delivered in Cassino and Frosinone, both in Italian and in English.

RESEARCH ACTIVITY

The research activities of the Department cover the fields of economic Sciences, business sciences and law, in an interdisciplinary perspective. The Department has developed over time special skills in numerous fields, including:

- Consumer studies: behavioral analysis, choices and protection;
- Macroeconomics, public economics and economic policies;
- Statistical methods and data analysis;
- Economic history and the history of economic thought;
- Sustainability and business management;
- Relationships between companies, networks, and markets;
- Innovation, quality management and new technologies;
- Entrepreneurship and human resource management;
- Finance and credit;
- Management and services for the Public Administration;
- Accounting, corporate governance, intellectual capital and business crisis;
- Marketing and commercial distribution;
- Internal and international migration;
- Legality and public administration;
- The rights of the individual on trial;
- Autonomies, forms of state and international law;
- Legal analysis of companies and the labor market;
- Hermeneutics, theory and history of law;
- Private legal relationships and new social models;
- Financial and economic law.

The Department is located within the European Research Area, with particular skills in the following fields:

- Innovation in SMEs;
- Inclusive, innovative and reflective societies;
- Health, demographic change and well-being;
- Access to risk finance;
- Food security, agriculture and forestry;
- Secure societies;
- Future and emerging technologies.

Respecting the autonomy of teaching, the Department performs a significant function of promotion, coordination, and direction of teaching activities, through two types of structures: the Sections and the PhD programme.
The Department is organized into three sections: Economics (SE); Law, Enterprise, Environment and Management (DIAM); Juridical Sciences (SG). According to the Department mission and regulations, the Sections have the task of coordinating the research activities of the members, favoring collaboration between the researchers and the efficient allocation of research funds; the initiatives related to the third mission are also coordinated. Each teacher is a member of a Section. The disciplinary areas of the three sections correspond to the three areas of interest of the Department.

The following table summarizes the composition of the Sections and shows the scientific disciplinary sectors involved in each of them.

The PhD programme ‘Businesses, Institutions, and Behaviors’ focuses on the relationships between individual and collective behavior, on the one hand, and the organization of institutions and economic activities, on the other. The PhD activity is characterized by its multidisciplinary nature, attested by the integration of social, economic, corporate and legal perspectives with respect to behavioral and organizational themes. The objective of the PhD programme is to provide a multidisciplinary knowledge, both in contents and research methodologies.

The PhD programme is divided into 3 curricula, that allow the doctoral students to acquire a strong specialization for research-oriented training and / or for professions requiring high scientific skills. The three curricula are:

a. Institutions and firms: this curriculum mainly uses methods of legal, business and management sciences to investigate, also from a historical perspective, the organization of institutions and the variety of ways in which companies can create and defend competitive advantages, also with reference to quality issues.

b. Economics and markets: the curriculum is focused on the economic and quantitative analysis of issues related to behavioral and industrial economics, market organization and the territory.

c. Behaviors: the curriculum addresses the relationship between human cognition and behavioral motivation, both individually and in collective and organized contexts, as well as creative, artistic and emotional processes.

The training provided by the programme allows the insertion of PhDs in positions suitable for managerial careers in public and private structures, in national and international research centers, or in academic and professional profiles in Italy and abroad.
THIRD MISSION

The Third Mission constitutes a fundamental asset of the Department’s activity, due to its contribution to the economic and cultural development of the territory. The third mission allows to transfer research results directly to the clients or partners, who wish to draw on the skills and expertise of the Departments’ researchers and professors.

The Department develops applied research activities through the stipulation of specific conventions, as well as by organizing cultural initiatives and through the dissemination of research results. In particular, the Department fosters the stipulation of framework agreements with local authorities, encourages third-party activities and the participation in Public Engagement initiatives. Such initiatives allow organizations (businesses, public and private entities) to develop projects and research activities together with the Department, in order to foster a synergistic development, in which the University contributes directly and concretely to the generation of added value. Over the years numerous projects have been developed, and several contracts and research agreements with private companies and with public entities have been financed. In particular, scientific and applied research agreements have been signed with the Lazio Region, ARSIAL, Laziodisu, Lazio Innova, Fondazione Roma, the Province of Frosinone, the Ministry of Agriculture, Food and Forestry Policies, the Ministry of Health, and several companies active on the territory.
RESEARCH LABORATORIES

The research activities of the Sections are developed within the research laboratories listed below:

Sea, Ports, Transport Professions Laboratory
Scientific Responsible: prof. Marco Badagliacca

Fundamental Rights Laboratory
Scientific Responsible: prof. Vincenzo Baldini

Sample Surveys and Data Analysis Laboratory
Scientific Responsible: prof. Simona Balzano

Laboratory for Quantitative Analysis of Territorial and Agri-food Systems LATA
Scientific Responsible: prof. Luca Bartoli

Laboratory of Organizational Studies ORGLAB
Scientific Responsible: prof. Francesco Bolici

Hermeneutics of law's temporality laboratory
Scientific Responsible: prof. Luigi Di Santo

ImprendiLab
Scientific Responsible: prof. Francesco Ferrante

Management and Dissemination of innovation Laboratory - MADI Lab
Scientific Responsible: prof. Vincenzo Formisano

Laboratory of Individual Rights and Market Regulation
Scientific Responsible: prof. ssa Margherita Interlandi

Laboratory on simplification for innovative and circular economic development
Scientific Responsible: prof. Margherita Interlandi
RESEARCH LABORATORIES

Corporate Finance Laboratory
Scientific Responsible: prof. Carmelo Intrisano

Creativity and Motivation Economic Research Center - CREAM
Scientific Responsible: prof. Sergio Nisticò

Laboratory of Commodities and Territory Analysis
Scientific Responsible: prof. Patrizia Papetti

Applied Mathematics Laboratory - QuantLab
Scientific coordinator: prof. Augusto Pianese.

Criminal Justice Laboratory
Scientific Responsible: prof. Gianrico Ranaldi

Marketing Lab - MarkLab
Scientific Responsible: prof. Marcello Sansone

Pole Laboratory of International Law
Scientific Responsible: prof. Giancarlo Scalese

Laboratory of Intellectual Capital - LinC
Scientific Responsible: prof. Raffaele Trequattrini
COMPETITIVE PROJECTS

In the 2016-2019 period the following European projects were funded:

2016

ICM: International Credit Mobility
Coordinator: prof. Sergio Nisticò

KA107: International Credit Mobility
Coordinator: prof. Andrea Moretta Tartaglione

2018

AWARE: After Action Review of WNV 2018 cAse detection and contRol in Europe
Coordinator: prof. Francesco Bolici

KA107: International Credit Mobility
Coordinator: prof. Giovanni Porzio

KA107: International Credit Mobility
Coordinator: prof. Sergio Nisticò

Tender: The impact of market structure on the dual food quality practices in the Single Market
Coordinator: prof. Carlo Russo

Tender: Pass-through of Unfair Trading Practices in EU food supply chains: Methodology and Empirical Application
Coordinator: prof. Carlo Russo

2019

KA107: International Credit Mobility
Coordinator: prof. Sergio Nisticò

KA107: International Credit Mobility
Coordinator: prof. Giovanni Porzio

LIBRARY

The Economics and Law Library (Centre for Bibliographical Services) manages the acquisition, cataloging and use of the book and documentary heritage of the Department of Economics and Law.
