

LUMINA — STUDENT QUICK GUIDE

Earn your certificate in Innovation Management & Entrepreneurship in 5 simple steps!

IMPORTANT

Lumina is a certification and progress-tracking tool. It helps you use your university courses for certification but does **NOT** register you for your official university courses. You must still enrol through your university's normal system.

WHAT LUMINA DOES

- Records eligible courses, BIPs and activities
- Checks your evidence
- Shows your progress towards certification

WHAT LUMINA DOES NOT DO

It does not replace your university's registration system, timetable, assessment process or official transcript.

HOW IT WORKS

1 CREATE YOUR ACCOUNT

Go to eis-tech.eu/lumina and register with your university email.

2 FIND YOUR ACTIVITY

Search by course title or official course code. You can add an eligible activity you are taking or have already completed.

3 REQUEST ENROLMENT

Click "Request Enrol". This adds the activity to your certification record and dashboard — it is not official course registration.

4 UPLOAD PROOF

Upload clear evidence, such as your transcript, grade record or BIP attendance certificate.

5 TRACK YOUR PROGRESS & EARN YOUR CERTIFICATE

Check your dashboard. Your request may show as Pending, Processing or Completed after review.

WHY THESE CERTIFICATES MATTER FOR YOUR CV

Adding the EUT+ Entrepreneurship School certifications to your CV shows employers that you are:

Proactive – you take initiative to build your skills

Future-oriented – trained in innovation, digital collaboration and entrepreneurship

European-minded – experienced in mobility and cross-cultural collaboration

Ready for collaboration
